

PSO Business Rebates Comprehensive Upgrades Bonus

Customers who complete three or more different types of retrofit upgrades are eligible for up to a 20% bonus rebate.

Eligible Retrofit Upgrades

- Lighting
- HVAC and VFDs
- Plug Load Controls
- Window Films
- Refrigeration, Kitchen Equipment and Appliances
- Custom (Chiller, Compressors, Process, Others)

Details

In addition to all measure-level technical requirements, the following requirements must be met in order to qualify for up to 20% bonus rebate:

- **Projects must be pre-approved by PSO.** The bonus is for retrofit projects and is not applicable for new construction or major renovation projects. The proposed project(s) must be pre-approved before purchasing and installation can begin.
- **Comprehensive measure savings projects may be completed in phases or all at once.** If you choose to perform installation in phases, you may submit your final invoices for each completed and installed measure to receive your standard rebate payment. You can then use these funds toward your next project.
- **The additional bonus is paid after all selected measures are installed, completed, and incentivized.** The 20% bonus is based on the total rebate payment of all measures with maximum cap of up to 5% for lighting projects.
- **Bonus lighting rebates cannot exceed the sum of total bonus rebates** from non-lighting categories.
- **Complete projects from at least 3 different categories.** Categories are outlined on the next page. If you would like to add options for additional rebates after receiving your project pre-approval, contact us, as approval is required additional projects.

Apply

1. Submit project information, including the Comprehensive Project List, measure specific documentation, and signed Terms and Conditions Form to PSOBusinessRebates.com.
2. Receive pre-approval for the eligible upgrades.
3. Complete the approved energy efficiency projects all at once or one at a time.
4. Submit all final documentation for review to receive the bonus rebate.
