

PSO Custom Rebates - Free Cooling-Cooling Tower Project Summary

Application Requirements:

- The PSO customer's account cannot be opted out of the Demand Side Management (DSM) Rider.
- All free cooling-cooling tower applications require pre-approval before the equipment can be purchased and installed.

Technical Requirements:

- Must be a new cooling tower with either a new or existing process of free cooling.

Required Documentation:

- This summary form
- Customer signed Terms and Conditions
- Spec Sheets of proposed equipment
- Quote of project cost

Upon Project Completion:

- Itemized Invoice, including the purchased date, model number, and quantity
- Customer signed Pre-approval Letter

Submit the rebate application online: www.psobusinessrebates.com

Cooling Tower with New or Existing Process of Free Cooling:			
Building Type			
Total Project Cost Estimate			
Material/Equipment Cost		Labor Cost	
System Capacity (kBTU/hr)			
Full Load Efficiency (kW/ton or EER)			
Integrated Part Load Value (IPLV)			
Quantity of Chillers			
Horsepower of (any) existing Tower Fan Motors			
Horsepower of new Tower Fan Motors			
Ambient temperature range that the building requires cooling and the existing chiller is enabled			
Enable Economizer Temperature			
Sequence of Operation (SOO) - include the outdoor temperature utilized for free cooling for each fan.
